CURRENTLY LEARNING

TypeScript
Next.js
Docker & CI/CD
AI / LLM Integration
System Design

TOOLS

VS Code
Postman
Figma
Vercel / Netlify

LANGUAGES

English (Fluent)
Malayalam (Native)

PROFILE

Self-taught full-stack developer passionate about building clean, functional web applications end-to-end — from pixel-perfect UIs to scalable APIs and databases. Currently levelling up into AI engineering, exploring LLM integration and intelligent product development. Driven by curiosity, shaped by real-world projects, and eager to contribute to a product-based team.

WHAT I BRING

- End-to-end ownership** Built and deployed full-stack apps solo — from DB schema to live URL.
- Fast learner** Picked up React, Node, MongoDB, and deployment pipelines self-taught.
- AI-forward mindset** Actively studying LLM APIs, prompt engineering, and AI-assisted tooling.
- Clean UI sensibility** Strong eye for design — builds interfaces people actually enjoy using.

PROJECTS

Note App — Full Stack

GitHub ■ Live ■

Complete note-taking app with user CRUD operations, REST API backend, and MongoDB persistence. Deployed live on Vercel.

React Node.js Express MongoDB Vercel

Habit Tracker — Full Stack

GitHub ■

Daily habit tracking app with progress visualisation, streak logic, and persistent data storage via MongoDB.

React Node.js Express MongoDB

F1 UI Simulator — Frontend

GitHub ■ Live ■

F1-themed dashboard built to master component architecture, layout systems, and responsive design with Tailwind.

React Tailwind CSS JavaScript

Movie Explorer — API Integration

GitHub ■

Movie browsing app with genre filters, dynamic routing, and detail pages. Built to practise consuming external REST APIs.

React Tailwind CSS JavaScript REST API

React E-Commerce — State Management

GitHub ■ Live ■

Frontend e-commerce UI with product listing, add-to-cart flow, and responsive layout — focused on React state patterns.

React Tailwind CSS JavaScript

CAREER GOALS

- Build production-grade full-stack + AI-powered applications.
- Master TypeScript, Next.js, Docker, and LLM API integration.
- Contribute to a product-based tech company as a Full-Stack / AI Engineer.
- Develop strong system design fundamentals for scalable architecture.
